

Baltimore City Mayor’s Office of Sustainable Solutions

Procurement Inclusion & Equity Performance Stat

Challenge

In June 2018 the City had over 1,634 outstanding late invoices for goods and services, with a total value of over \$9 million. These late payments are costly to small businesses.

Performance Goal

Reduce the number of late payments to vendors by 50%.

Results

MOSS led efforts to improve payment data reporting and conducted root cause analysis sessions with agencies. Since June 2018, when MOSS started tracking late payments, the number of late invoices owed by the City has been cut in half.

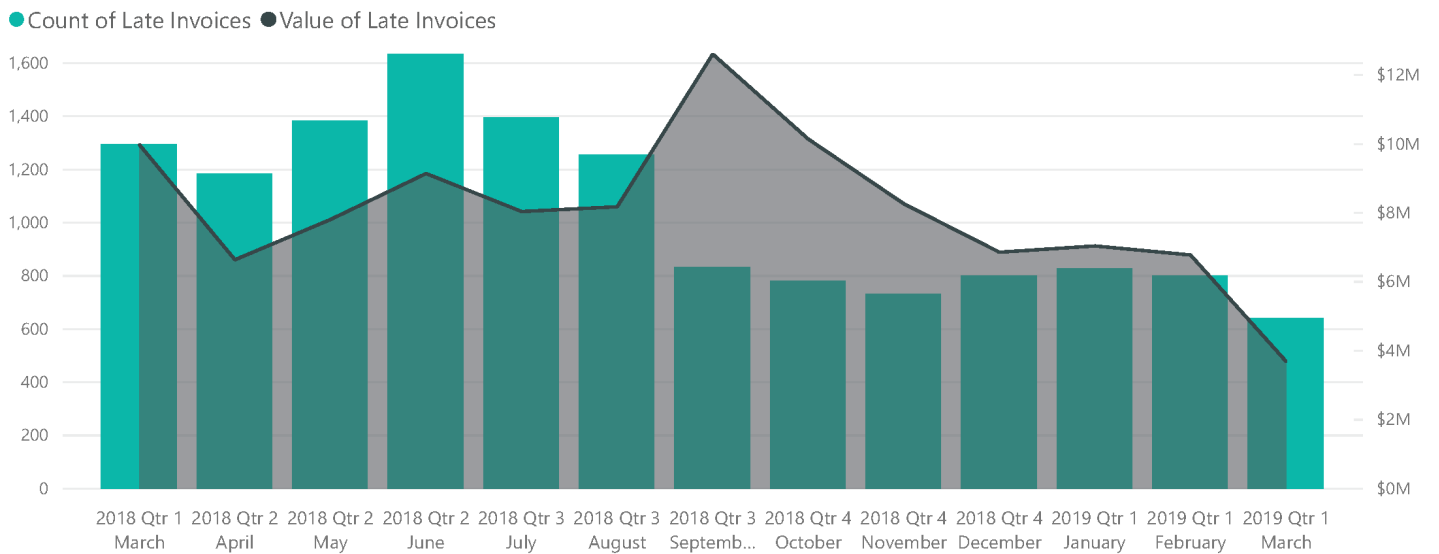

Stakeholders

- Agency Fiscal Officers
- Procurement
- Mayor’s Office of Minority and Women-Owned Business Development
- Law Dept

Through this work the team is working to make Baltimore a better partner to its community of local vendors.
